MARIAM LAMRANI

Cybersecurity Engineering Student

lamrani.mariam7@gmail.com | Kénitra, Morocco | LinkedIn: Mariam Lamrani
mariam947.github.io | github.com/mariam947

PROFILE

Final-year cybersecurity engineering student with hands-on experience building and securing lab environments: Active Directory hardening, SIEM monitoring with Wazuh and Zeek, detection rules and attack simulation. Looking for an end-of-studies internship in SOC, blue team or detection engineering.

EDUCATION

Engineering Cycle, Cybersecurity | International University of Rabat (UIR) 2024 – Present

Preparatory Classes, Computer Engineering | International University of Rabat (UIR) 2022 – 2024

Baccalaureate, Physical Sciences | Institut Les Mimosas du Gharb, Kénitra 2022

ACADEMIC PROJECTS

Hospital Network Security Lab with Real-Time Monitoring 2026

Windows Server 2019, Active Directory, Wazuh, Zeek, Kali Linux, Python

- Built a hospital-like infrastructure (AD, DNS, RBAC, SMB) hardened in layers: GPO, firewall, SSH, fail2ban, BitLocker, ClamAV, Lynis audit.
- Deployed a Wazuh SIEM with Zeek IDS, custom detection rules and an Isolation Forest anomaly model; validated with simulated attacks (Nmap, Hydra, Hping3).

C2 Architecture Simulation on GNS3 (team project)

GNS3, Suricata, PCAP analysis

- Simulated a command-and-control architecture in GNS3 and wrote Suricata detection rules from captured traffic.

C2 Framework from Scratch

Python, sockets, AES

- Implemented a C2 server with agent session management, remote command execution and an encrypted HTTP/HTTPS channel to simulate red team scenarios.

CyberSentinel, AI Threat Analysis

Python, Ollama, ChromaDB, RAG, FastAPI

- Built a web app that classifies and analyses threats with a local LLM and RAG; fully local processing, GDPR/HIPAA friendly.

Password Breach Analysis on Azure

Azure Web App, Function App, Logic App, Key Vault, Node.js

- Designed a cloud architecture that scores password strength, detects leaks and generates a downloadable PDF report, with secrets stored in Key Vault.

PROFESSIONAL EXPERIENCE

Information Systems Security Intern (PFA) | Délégation de la Santé et de la Protection Sociale, Kénitra Jun – Jul 2026

- Deployed and secured a health server on Windows Server 2019 (Active Directory, GPO, role-based access control).
- Set up real-time SIEM monitoring and wrote the technical end-of-internship report.

Technician Intern | Marokkko Biz, Morocco Jun – Jul 2025

- Developed the main page of the company's future website.

IT Intern | Global Electronic Business Solution (GEBS), Kénitra Jun – Jul 2024

- Discovered the IT environment and assisted the technical teams.

SKILLS

Monitoring and Detection: Wazuh, Zeek, Suricata, Kibana, OpenSearch
Offensive Security: Kali Linux, Metasploit, Nmap, Hydra, Hping3, Wireshark, CTF
Systems and Hardening: Windows Server, Active Directory, GPO, Linux, fail2ban, BitLocker, GNS3, VirtualBox
Development and Cloud: Python, PHP, JavaScript, HTML/CSS, SQL, MySQL, Git, Azure
AI and Data: Local LLMs, RAG, ChromaDB, Isolation Forest

LANGUAGES

Arabic: Native | French: Good | English: Good

ACTIVITIES

CYBrAIn Fest CTF at UIR, team Dolls1.exe
